

# KA2 - Cooperation for innovation and the exchange of good practices

## Before you begin completing this eForm:

- Test your connection to the Agency's online submission service. Click on the 'Test your connection' button in the footer of the eForm. This is not to submit your form but merely to test that your software settings and internet connection allow an application to be submitted. If having clicked on this button, you do not receive a confirmation that your connection was successful, please consult the 'Known Issues' section of the eForm homepage. Here you can find, amongst other things, advice on internet settings and Adobe (Reader or Acrobat) security settings, either of which can prevent a successful connection to the Agency's online submission service. Please note that, if after performing a successful test, you move your eForm to a different computer or upgrade your version of Adobe Reader, you will need to perform the test again. This is because the original test result will no longer be valid. For a fuller description of how the 'Test your connection' function works please consult the eForm User Guide.

- Check that you have the latest available version of the eForm. In the event of a significant eForm problem arising, the Agency may decide to make available an updated i.e. corrected version of the eForm. The latest version number of each eForm is displayed on the eForm homepage whilst specific details of any problem and its impact would be published on the funding opportunity webpage of the programme concerned.

These resources and other useful links can be found in a table located at the end of this eForm.

## Part B. Description of the project

### **B.1 Summary of the project (max 2000 characters). Please note that this information may be used for dissemination purposes**

For successful applications, this section will be published, as presented below, in compendia etc. You should therefore ensure that it gives a concrete overview of the work your consortium plans to undertake including:

- The reason of your project
- Concise description of the outputs, results and / or products (including where relevant key pedagogical strategies, media used, language versions, etc.)
- The impact envisaged

Please indicate the language of the summary \* :

English

Please provide your summary \* :

Knowledge and skills in the field of Systematic Innovation Methodologies (SIM) has a growing importance as a cross-sectional qualification for systematic analysis of complex contradictory situations in everyday professional life and to reveal innovative solutions.

The project team consists of four HEI experienced in SIM training, Leipzig University as a further HEI with the aim of establishing appropriate training structures, Schaeffler Technologies as a large industrial partner with long-term experience with SIM-skilled employees for the company's own development, two further SMEs with own SIM experience and Jantschgi C&R as a SIM consulting company. The team is completed by the partner Target Invention Minsk, whose team has been active in this field since the 1970s and brings important experience from own international activities, especially in the Asian region.

To increase the strength of SIM knowledge and skills structures in Europe this Knowledge Alliance aims to

1. form a strong networking structure of already successful SIM teaching and training in HEI at different EU locations and in different forms of HEI (focus A),
2. set up and develop a consulting and participation structure for this training infrastructure by companies from within the EU that are aware of the potential of SIM for their strategic development (focus B),
3. organise interoperation between these two networks, to get practical input for the development of corresponding curricula on the one hand and on the other hand, to offer use cases and challenging operational tasks for training and further development of the students,
4. further expand these networks with additional partners, and
5. support other HEI's in setting up appropriate training and further education offers.

The project contributes to strengthen the innovative power of EU companies expanding structures of training and further education in cooperation with entrepreneurial structures and inter-industrial organisations.

### **B.2 Educational Level and topics addressed**

*The content of this application is linked to the following area*

The field of education that will benefit from the activities /  
outcomes :

Higher education

## Part C. Other

### C.1 Learning Mobility (optional)

Learning mobility may be organised in so far as they support/complement the other activities of the Alliance and bring added value in the realisation of the project's objectives. Learning mobility means moving physically to a country other than the country of residence, in order to undertake study, training or non-formal or informal learning (e.g. traineeships, apprenticeships, youth exchanges, volunteering, teaching or participation in a professional development activity). Learning mobility activities may require preparatory activities, such as training in the host language, as well as sending, receiving and follow-up activities. Learning mobility activities can not constitute the main activities of a Knowledge Alliance.
